Pangenjurutengah, Purworejo, Jawa Tengah, Indonesia

I am a fresh graduate with a Bachelor's degree in Informatics from Universitas Sebelas Maret and internship experience as a Software Engineer at PT Takodam Ciptamandiri Nusantara and a Full Stack Developer at PT Sistem Integrasi Medika. I have experience developing and maintaining web applications, mobile applications, and RESTful APIs, AI, IoT, and operational systems throughout the Software Development Life Cycle (SDLC). My expertise includes frontend and backend development, API integration, SQL database management, writing structured and well-documented code, debugging, application testing, software maintenance, technical documentation, and Git-based source code management in Agile and Scrum environments. I am experienced in analyzing user and business requirements, collaborating with cross-functional teams, and delivering scalable, solution-oriented software. My involvement in organizational and academic activities has also strengthened my communication, teamwork, leadership, adaptability, and time management skills.

Education

Universitas Sebelas Maret - Surakarta, Indonesia

Aug 2022 - Apr 2026

Bachelor of Informatics, 3.83/4.00

- Published a first-author research article titled Medical Image Segmentation Using a Global Context-Aware and Progressive Channel-Split Fusion U-Net with Integrated Attention Mechanisms in JEEEMI, a Scopus Q3 and SINTA 2 accredited journal. JEEEMI: <https://jeeemi.org/index.php/jeeemi/article/view/1371>
- Awarded Third Place in GEMASTIK XVIII 2025 – Division VII (ICT Scientific Paper Competition). Announcement: https://www.instagram.com/p/DQnnU9ME0_x/?img_index=5

SMA Negeri 1 Purworejo - Purworejo, Jawa Tengah

Aug 2019 - May 2022

Senior High School, MIPA, 91.66/100.00

Professional Experience

PT Sistem Integrasi Medika (SISMEDIKA) - Banjarsari, Surakarta, Indonesia

Feb 2026 - Present

Full Stack Developer Intern

- Developed and maintained Diagnos Homecare, a web-based homecare platform, by implementing master data modules for homecare staff, services, and vouchers.
- Implemented frontend features for the Hospital Information System (HIS), including MCU reservations, autosave form builders, and patient billing to support hospital workflows.
- Developed core modules for the Material Management System (MMS), including Purchase Orders, Material Requests, and Received Orders to streamline material management processes.
- Enhanced KurirWest by implementing trip management, odometer tracking, trip reporting, assignment transfers, and digital handover documentation for courier operations.
- Built and integrated Halosis WA features for WhatsApp-based medical result delivery, including patient validation, automatic resending, error handling, and radiology file delivery.
- Implemented Environmental Laboratory System features, including Master Agreement, Sampling Plan, assignment letter generation, sample container barcode management, and SamplingPro PWA for field sampling activities.
- Developed the AI-powered ICD Prediction feature for AISYAH to assist clinicians in analyzing patient information and recommending appropriate ICD codes.

PT Takodam Ciptamandiri Nusantara - Laweyan, Surakarta, Indonesia

Aug 2024 - Dec 2024

Software Engineer Intern

- Developed an Internet of Things (IoT)-based factory machine monitoring system for a furniture machinery rental service supporting MSMEs in Sragen.
- Processed and presented real-time power and electricity consumption data to enable more accurate machine usage monitoring and calculation.
- Built backend services using Python, Django, and PostgreSQL, including database design, business logic, RESTful API development, and data processing.
- Developed frontend interfaces using FlutterFlow, including UI implementation, API integration, data binding, and connectivity with backend services.
- Collaborated within an Agile development team using GitHub for version control and participated in Scrum activities, including sprint planning, daily stand-ups, backlog grooming, and sprint reviews.

Organisational Experience

Badan Eksekutif Mahasiswa FATISDA Universitas Sebelas Maret - Surakarta, Indonesia <i>Internal Supervisory and Control Coordinator</i> Built and maintained a positive and inclusive organizational culture while promoting a healthy, effective, and harmonious organizational system.	Mar 2024 - Dec 2024
Himpunan Mahasiswa Informatika FATISDA Universitas Sebelas Maret - Surakarta, Indonesia <i>Deputy Head of Organizational Development</i> Supported organizational development by improving internal coordination and effective governance.	Mar 2023 - Dec 2023
PINGFEST (Pekan Informasi dan Teknologi 2024) <i>Event Coordinator</i> Handle the details of the national seminar and IT-Venture competition event from start to finish, and work closely with multiple stakeholders to ensure the event runs as planned.	May 2024 - Dec 2024

Skills, Achievements & Other Experience

- Soft Skills:** Problem Solving, Analytical Thinking, Team Collaboration, Communication, Leadership, Time Management, Adaptability, Attention to Detail
- Hard Skills:** Full Stack Development, Frontend Development, Backend Development
- Programming Languages:** Golang, PHP, Python, Javascript, HTML, CSS, SQL
- Frameworks & Libraries:** Laravel, Django, React, Vue.js, HTMX, Flutterflow, Tailwind CSS
- Methodologies:** RESTful API Development & Integration, Software Development Life Cycle (SDLC), Agile & Scrum, Requirement Analysis, Database Design
- Competency Training** (2025): AI Productivity and AI API Integration for Developers
- Certification:** Memulai Dasar Pemrograman untuk Menjadi Pengembang Software, Belajar Dasar Manajemen Proyek, Belajar Dasar AI, Memulai Pemrograman dengan Python
- Achievements** (2026): Published a first-author research article in JEEEMI (Scopus Q3 & SINTA 2 Accredited Journal)
- Achievements** (2025): Third Place - GEMASTIK XVIII 2025, Division VII (ICT Scientific Paper Competition)
- Achievements** (2021): First Place Winner, Appropriate Technology Competition - Rover Challenge 2021
