SUMMARY

I am a **Bachelor's degree** graduate in **Informatics** from **Sebelas Maret University**. I have experience in data processing, system and business requirement analysis, and preparing periodic reports to support operational workflows. Through my internships as a Full Stack Developer and Software Engineer, I collaborated with cross-functional stakeholders to analyze business requirements, identify process constraints, and develop end-to-end web applications by handling backend services, database management, and frontend implementation. I ensured that technical solutions aligned with operational needs and performance targets while maintaining accurate documentation and coordination with internal teams. I am detail-oriented, adaptive, and committed to continuous learning, supported by strong capabilities in information systems development and maintenance, database management (MySQL/PostgreSQL), API integration, and productivity tools such as Google Workspace and Microsoft Office.

EDUCATIONAL BACKGROUND

Sebelas Maret University ***August 2022 – March 2026***

Bachelor's Degree in Informatics (GPA 3.83/4.00)

- **Thesis:** Medical Image Segmentation Using a Global Context-Aware and Progressive Channel-Split Fusion U-Net with Integrated Attention Mechanisms.
- **Areas of Interest:** Web Development, Software Engineering, Data Processing & Reporting, Business Process Optimization, and Information Systems.
- **Soft Skills:** Adaptive Problem Solving, Cross-Functional Coordination, Decision Making, Technical Communication, Priority Management, Results Orientation, Discipline, and Initiative.
- **Languages:** English, Bahasa

CORE COMPETENCIES

- Data Processing & Analysis
- Business & System Requirement Analysis
- Information System Maintenance
- Agile & Team Collaboration
- Full Stack Web Development
- Database Design & Optimization

SOFTWARE SKILLS

- Go (Golang)
- Django
- PHP, HTML, CSS
- Flutterflow
- Git & Github
- Trello
- Figma
- Draw.io
- Microsoft Office
- Notion
- JIRA
- Google Workspace

WORK EXPERIENCES

PT. Sistem Integrasi Medika (SISMEDIKA) ***February 2026 – Present***

Full Stack Developer Internship

- Developed Diagnos Homecare, a hospital information management system to support homecare services, patient data management, and hospital operational workflows.
- Implemented full-stack features using Go (Golang) for backend services, MySQL for database management, and HTMX for building dynamic and efficient frontend interfaces.
- Collaborated closely with cross-functional team members (developers, UI/UX designers, and stakeholders) to gather requirements, clarify workflows, and translate user needs into technical solutions.

- Used Git for version control and actively participated in daily meetings to track progress, discuss issues, and align development tasks within the team.
- Conducted development and testing in a WSL Ubuntu environment to ensure compatibility and a stable development workflow.

PT. Takodam Ciptamandiri Nusantara (TAKODAM) ***August 2024 – December 2024***

MSIB Software Engineer Internship

- Developed an end-to-end factory monitoring web application for the furniture manufacturing industry using Django and PostgreSQL, covering requirements analysis, database schema design, and feature implementation.
- Translated business and operational requirements into scalable backend logic and database structures to support real-time factory monitoring.
- Designed, implemented, and tested RESTful API endpoints using Swagger UI, ensuring consistent request/response formats, proper validation, and robust error handling.
- Implemented backend business logic and data processing workflows to support monitoring, reporting, and system operations.
- Developed the frontend using FlutterFlow, including UI design, API integration, and data binding with backend services.
- Containerized and deployed the application using Docker on AWS Lightsail, managing environment configuration and deployment workflows.
- Collaborated within an agile team using GitHub for version control and followed Scrum methodologies, including sprint planning, daily stand-ups, backlog grooming, and sprint reviews.

FATISDA, Sebelas Maret University ***August 2023 – July 2024***

Computer Laboratorium Assistant

- Managed laboratory room and equipment bookings, ensuring availability and proper usage for academic activities.
- Installed, configured, updated, and troubleshot computer operating systems and software across laboratory machines.
- Performed routine system maintenance to ensure optimal performance and minimize downtime in the computer labs.
- Provided technical support to students and staff during laboratory sessions and academic activities.
- Assisted in the development and maintenance of the faculty website, contributing to content updates and basic feature improvements.
- Collaborated with laboratory staff to document technical procedures and improve operational workflows.

ORGANIZATIONAL & COMMITTEES

BEM FATISDA, Sebelas Maret University ***February 2024 – December 2024***

Internal Supervisory and Control Coordinator

- Built and maintained a positive and inclusive organizational culture while promoting a healthy, effective, and harmonious organizational system.

HIMASTER (Himpunan Mahasiswa Informatika) FATISDA, UNS ***February 2023 – December 2023***

Deputy Head of Organizational Development

- Supported organizational development by improving internal coordination and effective governance.

P!NGFEST 2024 ***May 2024 – December 2025***

Event Coordinator

- Handle the details of the national seminar and IT-Venture competition event from start to finish, and work closely with multiple stakeholders to ensure the event runs as planned.

AWARDS

Third Place Winner, GEMASTIK XVIII 2025 – Division VII (ICT Scientific Paper) ***2025***
National-level competition organized by Kemendikbudristek

Third Place Winner, National Physics Olympiad 2022 ***2022***
National-level competition organized by University.id

First Place Winner, Appropriate Technology Competition – Rover Challenge 2021 ***2021***
National-level competition organized by UKM Kepramukaan UGM
